

**Announcement No.5 of SELO (Revision. 3)
Requirement of Quality Manual for Chinese Manufacture Licensing**

Dear Sir or Madam:

Refer to the article 28 in Chapter 4 of "Requirements for Boiler and Pressure Vessel Manufacture Licensing"(download at <http://www.cbqvi.org/selo/selo/index.asp>), the quality manual should be established by boiler and pressure vessel manufacturer. Now, please allow us explain the requirements for quality manual as follows:

The quality manual is required to be an independent one. It's provided to the audit as well as the implementation of China's boiler & pressure vessel manufacture licensing.

Catalog and contents of quality manual shall involve the Article of 27 through 43 of "Requirements for Boiler and Pressure Vessel Manufacture Licensing" and describing item by item as following:

1. Management responsibility
2. Quality Systems
3. Document and data control
4. Design control
5. Purchasing and material control
6. Fabrication process control
7. Welding control
8. Heat treatment control
9. NDE control
10. Physical and chemical property examination
11. Pressure testing control
12. Control of other inspection and testing
13. Control of metrology and equipment
14. Control of non-conformity product
15. Quality improvement
16. Training
17. Procedure for implementing China boiler and pressure vessel manufacture licensing system

If you have the question about this, please inquiry the International Div. of CSEI(China Special Equipment Inspection & Research Center) at Guoji@csei.org.cn or other corresponding consultancy agency.
